

COMET

STRAIGHTENING BENCH

The **COMET Straightening Bench** is a versatile car frame straightening bench designed for professional auto body shops. With its spacious 4800mm length and 1115mm width, it accommodates the widest range of vehicles from compact cars to light commercial vehicles. The adjustable height range of 220-1250mm allows technicians to work comfortably at various levels.

- Key features include the Celette Cameleon Universal Jig System for precise vehicle alignment, a 360° rotating pulling tower for versatile repair angles, and a high-capacity pulling force of 100KN.
- The bench is compatible with electronic measuring systems and suitable for the widest range of vehicle makes and models, thanks to the Celette car sheet database.
- Its robust construction is designed to handle heavyduty repairs.
- The powerful pulling tower, combined with the Celette Cameleon Universal Jig System, enables precise and efficient frame straightening for even severe collision damage. This bench is built to meet the demands of modern repair techniques and is compatible with advanced electronic measuring systems for accurate diagnostics and repair verification.

Specifications	Values
Maximum load capacity	4300kg
Power	2.2KW
Current	<16A
Rated voltage	380V / 230V (3P)
Air supply required	0.5-0.8Mpa
Working range of pulling tower	360°
Maximum pull of pulling tower	100KN
Workbench height	0.22-1.25 m
Workbench width	1.1 m
Workbench length	4.8 m
