Product description:

Bodywork quick straightening workstation for outer skin damages of passenger cars.

CELETTE X-ONE The X-ONE is a straightening and body work platform for exterior skin damage repairs. This includes in particular repairs on wings, side panels, sills as well as minor repairs of damage to front and rear side members. Repairs can be done efficiently by simply driving over, lifting and anchoring.

The pulling unit, equipped with 10 t pulling force, can be connected directly to the X-ONE and can be lifted together with the vehicle and platform in order to provide the user with a gentle working position.

The X-ONE can also be equipped and extended with an adapter kit for the NAJA electronic measuring system, which allows measurements as well as computer-aided forming work.

Advantages at a glance:

- Easy driving over and anchoring of the vehicle
- Can be used daily
- Ergonomic working height for ergonomic and efficient work
- Access to all areas of small and cosmetic damage
- Upgrade and combination option with electronic measuring system NAJA
- Designed for pulling operations with up to 10 t
