Product description:

Bodywork straightening workstation for commercial vehicles over 2.2t payload CELETTE GRIFFON XL 4.2t
The GRIFFON XL is a straightening and bodywork platform for daily use in a bodywork workshop for passenger cars and vans over 5.5 meters with a payload of over 2.2 tons. It combines the advantages of a drive-on platform with those of a frame machine and is suitable for all body repairs and repairs. Thanks to its two hydraulic scissor lift and the jacks, vehicles up to 4.2 t can be lifted to a favourable working height, enabling the technician to work efficiently and ergonomically.

It can also be used as a measuring platform in combination with the NAJA measuring system for car body measurement.

Advantages at a glance:

- Easy drive on and anchoring of the vehicle
- Can be used daily
- Ergonomic working height for efficient and economical working
- Compatible with all CELETTE straightening systems
- CELETTE components from former frame machines can be reused
- Upgrade and combination option with electronic measuring system NAJA
- Designed for heavy, complex pulling operations up to 10t
- Suitable for vehicles over 5.5 meters in length and up to 4.2 t payload with mechanical parts in or out
